|--|-----------|
| Dedication.....  | ix        |
| About the Authors.....   | xi        |
| Foreword.....  | xiii      |
| Preface.....   | xv        |
| <b>Chapter 1—Infection Control as a Health Care Discipline.....</b>    | <b>1</b>  |
| Historical Perspective.....  | 1         |
| Infection Control Programs in the United States.....                   | 1         |
| Epidemiology of Nosocomial Infection.....                              | 2         |
| Status of Infection Control in Home Care and Hospice.....              | 3         |
| References.....  | 5         |
| <b>Chapter 2—The Infectious Disease Process.....</b>                   | <b>7</b>  |
| Agent, Host, and Environment.....                                      | 7         |
| Types of Infection.....  | 7         |
| Normal Flora.....  | 7         |
| Chain of Infection.....  | 8         |
| Causative Agent.....   | 8         |
| Reservoir of Infection.....  | 9         |
| Portal of Exit.....  | 11        |
| Portal of Entry.....   | 11        |
| Mode of Transmission.....  | 11        |
| Contact Transmission.....  | 11        |
| Airborne Transmission.....   | 12        |
| Vehicle Transmission.....  | 12        |
| Vector Transmission.....   | 12        |
| Reducing the Risk of Infection.....                                    | 12        |
| Susceptible Host.....  | 12        |
| Intrinsic Risk Factors.....  | 12        |
| Extrinsic Risk Factors.....  | 13        |
| Impact of Home Care and Hospice Staff.....                             | 14        |
| References.....  | 14        |
| <b>Chapter 3—Patient Care Practices.....</b>                           | <b>15</b> |
| Hand Hygiene.....  | 15        |
| Resident and Transient Microorganisms.....                             | 15        |
| Hand Hygiene Terminology.....  | 16        |
| Indications for Handwashing and Hand Antisepsis.....                   | 17        |
| When to Use Plain Soaps Versus Antiseptic Agents for Hand Hygiene..... | 17        |
| Bar Soap Versus Liquid Soap.....                                       | 18        |
| Hand Hygiene Facilities.....   | 18        |
| Side Effects of Hand Hygiene.....                                      | 19        |
| Considerations When Purchasing Hand Hygiene Products.....              | 19        |
| Other Hand Hygiene Considerations.....                                 | 19        |
| Behavioral Aspects of Hand Hygiene.....                                | 19        |
| Hand Hygiene Supplies Needed by Home Care Staff.....                   | 20        |
| Using the Patient's Hand Hygiene Supplies.....                         | 20        |
| Antiseptic Hand Rub.....   | 20        |
| Fire Hazards and Storage of Alcohol-Based Hand Rubs.....               | 21        |
| Assessment of the Patient and Home Environment.....                    | 22        |
| Wound Care.....  | 22        |
| Clean Technique Versus Sterile Technique.....                          | 23        |
| Selecting the "Right" Technique.....                                   | 23        |
| Wound Care Procedures.....   | 24        |
| Irrigating Solution Maintenance.....                                   | 25        |
| Preparing Irrigation Solutions in the Home.....                        | 25        |
| Patient Education Related to Wound Care.....                           | 26        |
| Reusing Equipment in the Home.....                                     | 26        |
| Urinary Tract Care.....  | 26        |
| Condom Catheter Drainage.....  | 27        |
| Indwelling Catheter Insertion and Replacement Frequency.....           | 27        |

|   |           |   |    |
|---|-----------|---|----|
| Catheter Maintenance .....                      | 28        | Preventing Central Line-Associated Infections ... | 41 |
| Meatal Care .....                               | 28        | Selecting an Appropriate Catheter Insertion       |    |
| Indwelling Catheter Irrigation .....            | 28        | Site .....  | 41 |
| Suprapubic Catheters .....                      | 28        | Peripheral Venous Access Site Selection ...       | 41 |
| Intermittent Catheterization .....              | 29        | Midline Venous Access and PICC Site               |    |
| Cleaning and Disinfecting Intermittent          |           | Selection .....                                   | 42 |
| Urethral Catheters .....                        | 29        | Selecting an Appropriate Type of Catheter .....   | 42 |
| Cleaning and Disinfecting Urine Collection      |           | Catheter Insertion .....                          | 43 |
| Tubing and Bags .....                           | 29        | Replacing IV Access Devices .....                 | 43 |
| Specimen Collection .....                       | 29        | Removing IV Access Devices .....                  | 44 |
| Patient Education for Prevention of Urinary     |           | Replacing Administration Sets .....               | 44 |
| Tract Infection .....                           | 29        | Needleless Intravascular Devices .....            | 44 |
| Respiratory Therapy and Infection Control ..... | 30        | Replacing IV Solutions .....                      | 44 |
| Prevention of Health Care-Associated            |           | Catheter Site Care .....                          | 45 |
| Bacterial Pneumonia .....                       | 30        | Skin Preparation .....                            | 45 |
| Breathing Circuits .....                        | 30        | Midline and Central Venous Catheter               |    |
| Suctioning of Respiratory Tract Secretions ...  | 30        | Dressing Changes .....                            | 45 |
| Cleaning and Disinfecting Tracheal              |           | Injection Cap Changes .....                       | 46 |
| Suction Catheters .....                         | 31        | Filters .....                                     | 46 |
| Cleaning and Disinfecting the Inner             |           | Flushing the Catheter .....                       | 47 |
| Tracheal Cannula .....                          | 31        | Culturing for Suspected Infusion-Related          |    |
| Cleaning and Disinfecting Respiratory           |           | Infections .....                                  | 47 |
| Equipment and Supplies .....                    | 32        | TPN Administration .....                          | 48 |
| Other Measures to Prevent Respiratory           |           | Pediatric Patients .....                          | 48 |
| Infection .....                                 | 32        | Nonvascular Access Devices .....                  | 48 |
| Preventing Aspiration .....                     | 33        | Epidural Catheter, Port, or Pump .....            | 49 |
| Patient Education for the Prevention of a       |           | Intrathecal Catheter, Port, or Pump .....         | 49 |
| Respiratory Tract Infection .....               | 33        | Blood Storage for Home Transfusions .....         | 49 |
| Prevention and Control of Influenza .....       | 33        | Blood Storage During Transport .....              | 49 |
| Modifying the Host Risk for Infection           |           | Blood Storage in the Patient's Home .....         | 50 |
| Through Vaccination .....                       | 33        | Infection Control in Pharmaceutical Services ...  | 50 |
| Enteral Therapy .....                           | 34        | Pharmacy Sterile Compounding                      |    |
| Cleaning Enteral Feeding Equipment and          |           | Requirements .....                                | 50 |
| Supplies .....                                  | 34        | Medication Storage .....                          | 52 |
| Patient Education Related to Enteral            |           | Storage and Transport of Parenteral               |    |
| Therapy .....                                   | 34        | Medications .....                                 | 52 |
| Post-Mortem Care .....                          | 34        | Medication Storage in the Patient's Home ...      | 52 |
| Precautions for Handling the Deceased Body      | 34        | Preparation of Parenteral Medication in           |    |
| References .....                                | 35        | the Home .....                                    | 52 |
| <b>Chapter 4—Infection Control in</b>           |           | Multidose Vials .....                             | 53 |
